EXPERIENCE

gridX GmbH, Aachen

Software Engineer (Tech Lead)

August 2022 - PRESENT

Technical Leadership & Product Development

Designed and implemented data ingestion pipelines handling **45k+ requests/sec** and **200k+ batch events** hourly, enabling live and historical time-series analytics for enterprise customers.

Developed data lake and ETL pipelines to process distributed energy resource data, powering advanced analytics and decision-making.

Architected cost-saving services that reduced daily infrastructure spend while maintaining performance and reliability.

Owned end-to-end delivery and operations of a real-time energy data platform, ensuring resilience, scalability, and high availability.

Led and mentored junior developers, improving team velocity and code quality through coaching and best practices.

Drove performance optimizations through data-driven analysis, cutting query latency and improving developer experience.

Tech Stack: Golang, gRPC, REST, Protobuf, Docker, Kubernetes (EKS), AWS (Lambda, Kinesis, SQS, S3), Redis, Postgres, Terraform, CI/CD (Buildkite, GitHub), Monitoring/Observability (Grafana, Loki, Tempo, Prometheus), Collaboration (Jira, Confluence, Slack).

Docomo Digital Payments, Düsseldorf

Senior Software Engineer

June 2021 - July 2022

Developed and scaled billing platform handling **300k+ transactions per hour** for **millions of global users**.

Improved stability by preventing redundant job execution in multi-node deployments, reducing downtime and failures.

Optimized core transaction processing flows, improving throughput and reliability across global carrier integrations.

Stack & Tools: JAVA, Spring, SpringBoot, Hazelcast, JPA, Junit, Kafka, Postgresql, ELK, SOAP, REST, Tomcat, Maven, SOAPUI, LINUX, IntelliJ, Bitbucket (Git), JIRA, Confluence, Jenkins

SKILLS

Primary: goLang, Java, AWS, ETL, Event Driven/Stream Processing, APIs, Architecture

Software Development best practices: TDD, DDD, Agile, Microservices, REST, gRPC, Unit Testing, Integration & e2e testing

Strong analytical and Problem solving skills, Mentoring, Feedback, Initiative & Ownership, Strategic Thinking

Project organizational and Planning skills, Agile methodologies

Secondary: Python, Terraform, DevOps, CI/CD, k8s

TOOLS I'M USING

GitHub, Slack, JIRA, Confluence, Git, IntelliJ, Kanban, AWS, Jenkins, BuildKite, Backstage, k9s

LANGUAGES

Fluent English, Basic German (A2), Native Hindi

ICE International Copyright, Berlin [2016-2021]

Senior Developer

March 2020 - May 2021

Led development of the ICE Online Licensing and Import Systems, providing technical leadership for the Import platform and coaching external developers to improve delivery quality.

Introduced workflow automation, reducing manual processing effort and improving operational efficiency.

Redesigned and delivered an updated Licensing user interface with modern frameworks, improving usability and customer experience.

Built and maintained data processing pipelines using Spark & Scala, Java batch jobs, middleware services, AWS Lambda functions, and Spring Boot microservices to ensure scalable and reliable system operations.

Stack: Java, Scala, Spring, Hibernate, JUnit, SQL, Apache Spark, Maven, Git, AWS, JIRA, GitHub, Slack, Confluence, Service Now

JAVA Developer

April 2018 - Feb 2020

PHP Developer

April 2016 - March 2018

Siemens Healthcare, Erlangen— Master Thesis

May 2015 - March 2016

Thesis topic: Extraction of Relevant Clinical Data for Radiological Diagnosis based on FHIR

A (AI) helper tool to assist Radiologists while preparing Radiological Reports, By providing them with relevant information on which they are making a diagnosis in real time.

Stack: Domain Modelling, Data Extraction, XML, Ontology, NLP, Semantic Searching, .NET C#

Siemens AG (Healthcare Sector), Erlangen— Working Student

December 2014 - April 2015

Working Student: The evaluation and development of software prototypes in the field of radiology report generation.

Development of prototype web application for handling Radiology report templates, single central repository of all radiological reports where users can combine components to make new reports format.

Stack : PHP, MySQL, XML, XSLT, Angular js, Apache

CERTIFICATION & RECOGNITIONS

Senior Engineer to Lead: Grow and thrive in the role

Maven - Issued June 2025 -
Credential ID: vJWSYwq

Leadership Training for Emerging Leaders

Eager Labs - Issued Aug 2023 -
Credential ID:
01dcb634-4325-4bcb-814c-0df4
b6206a8c

Machine Learning, Data Science and Deep Learning with Python

Udemy - Certificate ID:
UC-0f76aeb9-2525-4422-85e0-6
3ce86ac5b99

Linux System Administration

NobleProg - Certificate ID:
524061

EDUCATION

SRH University of Applied Science, Heidelberg — MSc.

March 2016

Master of Science,
Computer Science

Visvesvaraya Technological University, Bangalore — B.E.

July 2013

Bachelor Of Engineering,
Computer Science
